

As long as I am paying for the services of satellite radio, I feel that NAB has absolutely no right to impose on my choices. I see no difference in satellite radio & the satellite dish I use to receive programming that I have paid for such as HBO & Showtime. With satellite radio I have the choice to choose what I want to hear just as I have the choice of what I want to watch on television. Perhaps this is making the NAB realize they no longer hold a monopoly on broadcasting which has allowed them to avoid spending money that might improve the quality of their programming.

Please consider rejecting petition 04-160. The NAB has absolutely no right to take away my freedom to choose just because they fear losing financial gains.
